

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claims 1-8 (cancelled)

9. (new) Stock for rifle that it is formed by at least two elements shaped in such a way that element 1 is not in direct contact with the shoulder of the shooter, and element 2 is not integral with the breechblock of the rifle, characterized in that said element 1 can rotate according to element 2 on a horizontal and a vertical plane.

10. (new) Stock for rifle, according to claim 9, characterized in that it is composed of an element 1 integral with the breechblock of the rifle 3, an element 2 which rests on the shoulder of the shooter, joined by at least two sufficiently rigid pins 8 attached by one end to plates 9 embedded in either element 1 or 2 of the stock, and attached by the other end by means of screws 12 to one of the plates embedded in either element 2 or 1 of the stock itself.

11. (new) Stock for rifle, according to claim 10, characterized in that the elements 1 and 2 can be adjusted in a vertical direction through regulation of the height of the pins 8 by actuating the screws 12.

12. (new) Stock for rifle, according to claim 10, characterized in that adjustment in a vertical direction of elements 1 and 2 can take place by inserting shims between the two elements.

13. (new) Stock for rifle, according to claim 10, characterized in that the elements 1 and 2 can be adjusted in a horizontal direction by moving the hooking of the pins 8 with regulation of the plates 9 by actuating the screws 10.

14. (new) Stock for rifle, according to claim 9, characterized in that, by means of appropriate regulations, the alignment between the end 5 of the stock in contact with the shoulder of the shooter and the breechblock 3, and therefore the barrels of the rifle, can be modified according to the reciprocal translation and rotation of elements 1 and 2 on a horizontal plane and vertical plane.
